

Antique Farm Machinery Exhibit

42st Anniversary Celebration

Located just inside the Kenosha County Fair main gate is a taste of yesteryear. See the old tractors, engines, and machinery from a time gone by. You are likely to see an old fashioned pitcher pump to draw water as well as a rope maker which makes rope from

baling twine (and get to make a rope of your own to take home with you). You can see how corn was ground into feed, or just sit a while and watch the machinery run. You **are** likely to see John Deere, Allis Chalmers, and Farmall Tractors, along with many others which may run in the antique tractor parade.

If you have any old engines, tractors, horse drawn equipment, garden or farm equipment, tools or any farm related paraphernalia you would like to display, you are more than welcome to come and join us in the antique machinery tent and have some fun displaying your toys. If you have any questions, or would like more information about displaying at the fair, call Bill Herreid at (262) 862-7660 or send an email to kcf_machinery@yahoo.com.
